SUSTAINABLE PACKAGING

CATALOG

HI, I'M VERONICA

The sustainability movement is becoming more prevalent today, with public and private sectors starting to practice and regulate sustainability initiatives. Consumers now recognize sustainability as a critical driving force in their decision-making, packaging included.

I am committed to providing our clients the best resources in today's market, because I stand for what is best for our environment. Together, consumers and clients have the power to change eCommerce for the better, achieving a 100% true recycling rate.

We're here for your sustainable packaging needs."

Veronica L.

LET'S DO IT!

Doing Our Part!

The base stock of labels is 100% recyclable. It is certified through the SFC (Sustainable Forestry Council). That means the chain is monitored from the process of chopping the wood to the process of making the stock. It is sustainable responsibly grown.

The silicone liner is not fully recyclable. Currently there are no recyclers that will accept the liner, due to the Chinese embargo during the Covid pandemic.

For an eco-friendly solution, AMS has developed "One More Life" packaging line, including label backing liners as an alternative to dunnage, saving money, time and giving single use packaging a second life.

We aim to source our sustainable packaging from local suppliers. This will help with the carbon footprint of trucking in the product.

PRODUCT HIGHLIGHTS

ULINE

Provides next day delivery, and has a sustainable line of products.

ECO ENCLOSE

Provides regenerative material production, and any virgin materials are made from resources whose production strengthens soils, waterways, habitats, air quality, and local communities.

METROPACK

Offers OceanPoly products which is unique in the fact that the plastic it is created from is sourced directly from areas that lack community collection efforts – areas that are more likely to result in plastic flowing directly into the ocean.

THE BETTERPACKAGING .CO

BCorp certified and carbon neutral. Uses regenerative packaging to deliver positive impact for the planet and people.
